

"Hear The Power & Feel The Noise Of NTPA Championship Truck and Tractor Pulling"

Beginning on Saturday, September 3rd, 4 PM EST, RFD-TV welcomes the National Tractor Pullers Association (NTPA) to its network.

The NTPA is truck and tractor pulling's world leader when it comes to this type of motorsport. The NTPA is a professional brand of competition, hosting more than 280 sessions of pulling action throughout the eastern half of the U.S. and Canada. The NTPA is the sports oldest and most respected entity when it comes to premier truck and tractor pulling competition.

Any tractor pull may be called the ultimate contest between the proverbial immovable object and the irresistible force. However, the NTPA leads the way in brute force, jaw-dropping displays of supreme horsepower. The object of pulling is to pull the weight, which becomes progressively heavier via a machine called a sled, down the track as far as a competitor and their machine can take it. The competitor

pulling the furthest distance without going out of bounds is declared the victor. There are twelve varying classification of NTPA Championship Pulling.

The tractor divisions replicate the farm style tractor with various alterations and performance upgrades. These classes include the Super Farms, Pro Stocks, Super Stock Diesel, Super Stock Open, and Light Super Stock tractor classes. These machines vary from 1000 to 5000 horsepower depending on the class. A far cry from what they started with on the farm.

There are also three types of Modified tractor classes that include a Mini Modified class, limited Modified class, and an Unlimited Modified class. These supercharged monsters can range from 2000-12,000 horsepower. A true display of eye-popping power indeed. This is where "Hear the Power and Feel the Noise" originates.
